

## Heel Measurement Table

Measurements are taken on the outside of the bottle at We chose not to measure from the filling hole (center) | would require opening every unit with excess heel. This require a tool, a dipstick, cleaning supplies and a colle for contaminated rags. Measurements from the filling h bottle exterior do not match.

\* Heel between 14 gal and lowest marking will be our best and fairest estimate

1"	7 gal.
1 1/2"	11 gal
2"	14 gal

IMACC Corporation will charge for excess heel for any **Non-haz** heel over 1" (7 gal.). Some contractual obligations could override this policy.
